# Our value proposition

Fully managed services

# We serve the full spectrum of the value chain

Our product portfolio solves your end-to-end content creation, distribution & monetization needs

# How we help our three core segments

## Broadcaster networks

- Channel origination using a simple, unified web browser
- Live broadcast with rich graphics
- Opt-out feeds to suit regional preferences & rights requirements
- Global distribution and reach across TV & OTT audiences

## Content owners

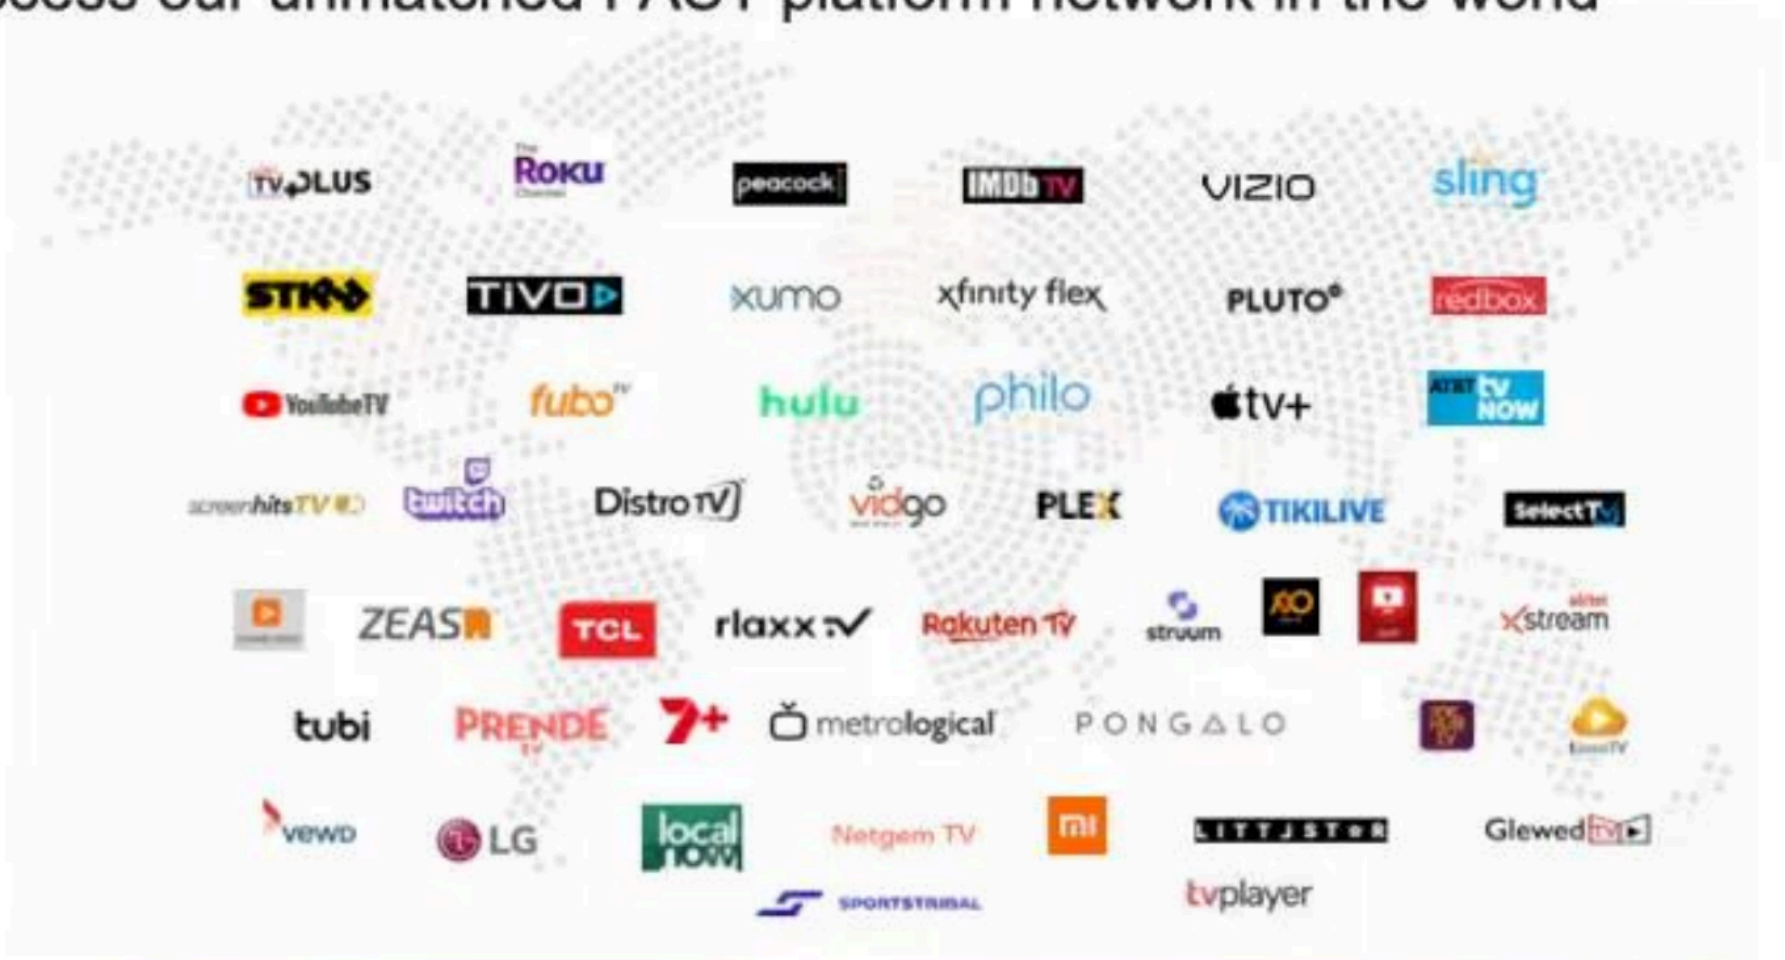

- Create & distribute linear TV channels to OTT platforms
- Manage live & VOD content
- Monetize through dynamic ad insertion (DAI)
- Reach over 200 million households through FAST platforms
- Access 25+ billion ad opportunities

## Streaming TV platforms

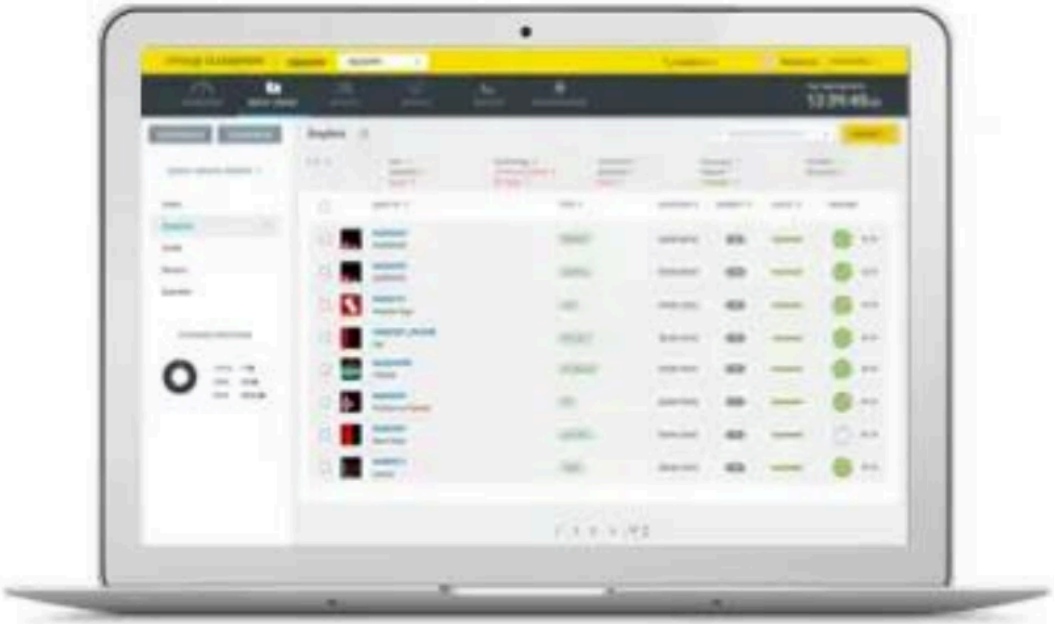

- Add third party channels
- Create O&O channels using a simple web platform
- DAI integration for monetization
- Technical integration with platforms using versatile connectors
- Deliver to D2C apps & CTV

# Access our unmatched FAST platform network in the world

# Amagi CLOUDPORT

World's most advanced Cloud-based channel automation & playout platform for linear TV and OTT channels

## Features

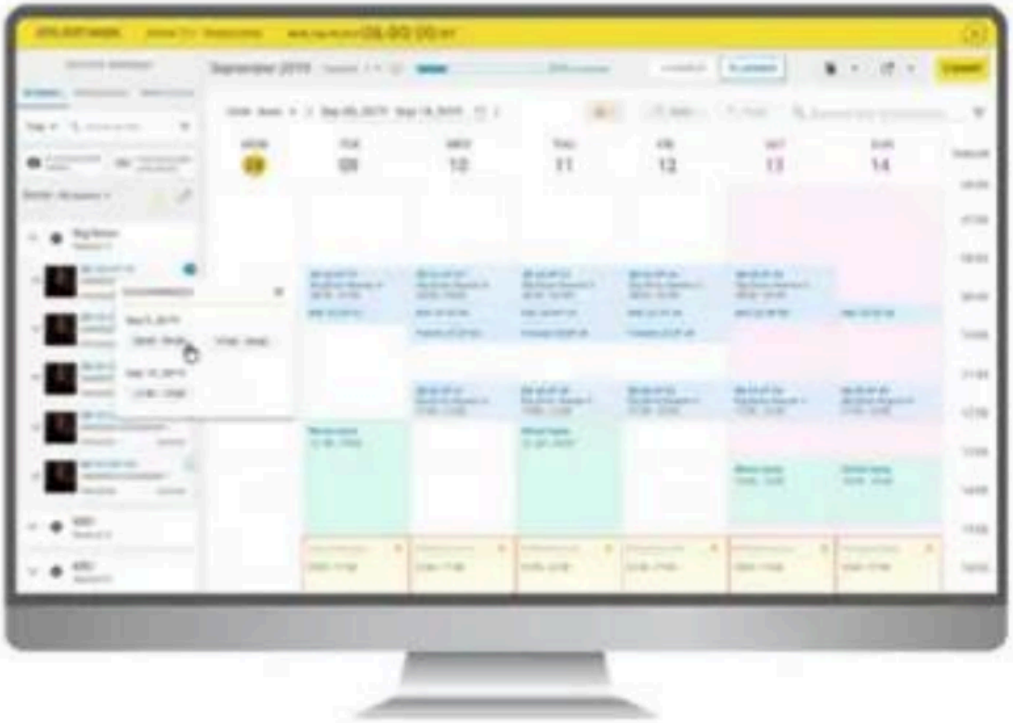

- Multichannel playout of live, near-live and library content
- Template based Advanced dynamic graphics
- Advanced scheduling
- Deployable on premise, cloud or at the edge
- Supports SD/HD/4K UHD
- Support for closed captions, SCTE-35

## Benefits

- Quickly create high quality, feature-rich channels
- Easy & automated content ingest
- High reliability & scalability

# Amagi PLANNER

Making scheduling simpler & quicker

## Features

- Content planning: monthly calendar view
- Automatic break insertion
- Promos/fillers
- Automated TV series scheduling
- Repeat content wheels
- Seamlessly integrated with Amagi CLOUDPORT

## Benefits

- Schedule in minutes not hours
- Simplify efforts by creating media repetition patterns
- Enjoy cost advantage not available with traditional, complex scheduling solutions

# Amagi LIVE

True-cloud-based broadcast grade live sports/news orchestration platform with ganged controls

## Features

- Multi-source, multi-protocol ingest
- Low latency
- Frame-accurate live controls – dynamic breaks, graphics etc.
- Ganged control
- Automated Live to VOD

## Benefits

- Cost-effective live processing with fewer resources
- Centralized control of multiple events
- Exponentially increases depth and breadth of live coverage

# Sports automation

Deliver stellar sports viewing experiences

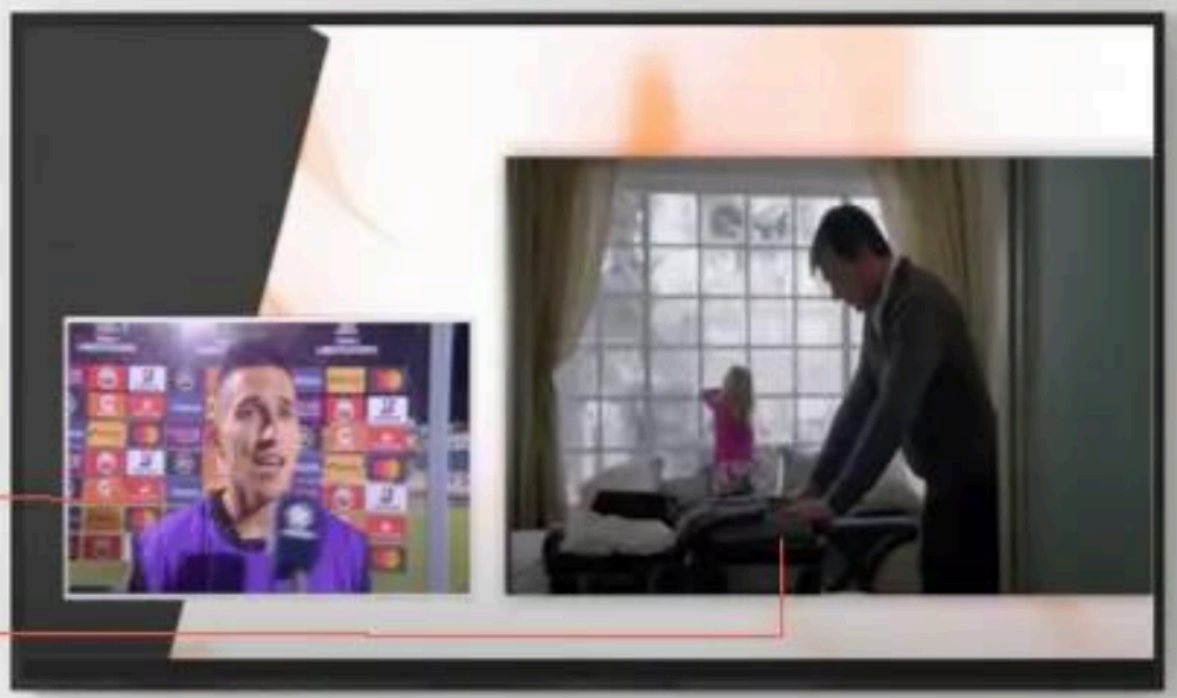

## Features

- Live inputs
- Master control
- Dynamic ad management
- Live recording
- SCTE
- Voice-overs and closed captioning
- Regional blackouts
- Late/extended live events handling
- Live graphics
- Low latency design

# Sports graphics at its best

Flexible, powerful graphics support for cloud based graphic vendors

- Customize
- Localize
- Experiment

# News automation

Increase your news production efficiencies

- Multiple live source ingest
- News/traffic schedule integration
- News interface – integrations with news rundowns to support live news/clips
- Breaking news support
- Automatic live recording and playback

- Hub-and-spoke/centralized operations
- SCTE automation
- Live news tickers/lower thirds for breaking news
- Weather, time widgets
- Wall-clock time sync for live news shows

TEGNA TYT yahoo! finance BNC LX

# News graphics at its best

Lower third HTML5 graphics

HTML5 based dynamic graphics

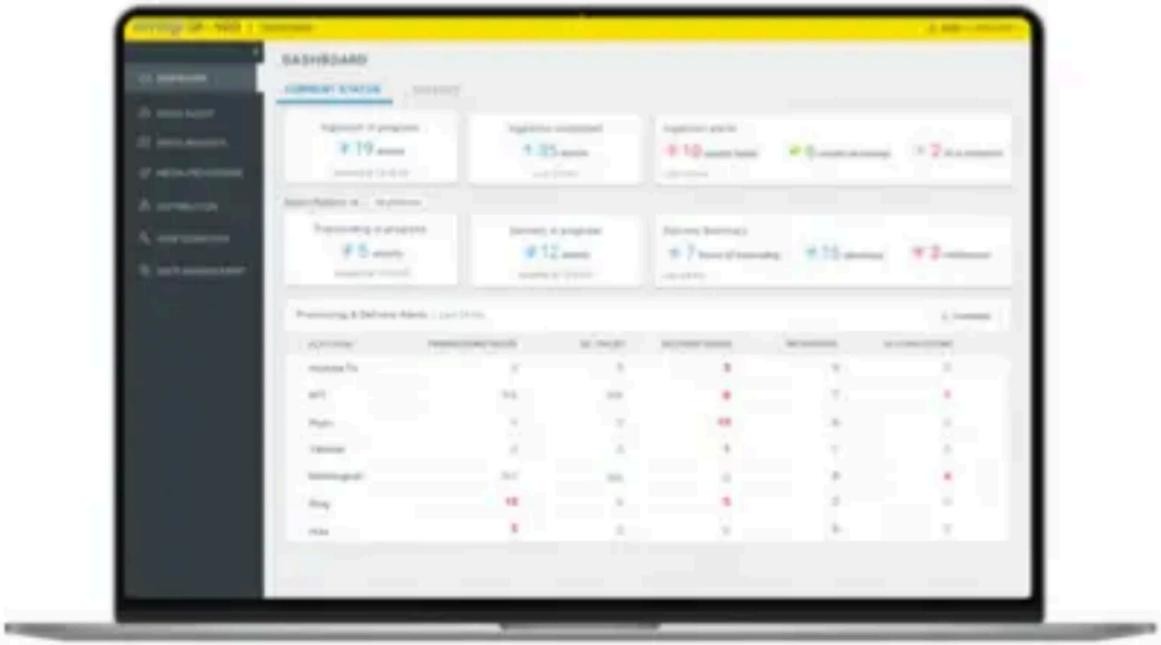

Live weather updates from RSS

Channel bug

Live clock widget

# Amagi ON-DEMAND

Cloud-based orchestration platform to seamlessly manage an entire VOD asset processing workflow – from content ingest to delivering VOD assets for a multitude of OTT and vMVPD platforms

## Features

- Simple user-interface, integrated workflow engine for hot deployment
- End-to-end control over the ingest pipe
- Integrates with CLOUDPORT and other platforms
- Supports industry-standard feed formats
- Transcoding capabilities for multiple output formats
- High speed delivery mechanism

## Benefits

- Real-time alerts for bird's-eye view over multiple VOD workflows
- Easy to use dashboard with access to all VOD workflow metrics
- Automated reporting on health of asset ingest and delivery to platforms

# Amagi THUNDERSTORM OTT DAI Service

Fully managed ad-monetization-as-a-service with 24x7 monitoring to monetize live, linear and VOD content

## Features

- Server-Side Ad Insertion (SSAI) with deep integration with platforms
- ML-based mid-roll ad-point detection
- Automated monitoring alerts & system dashboard
- Integrated Ad server + Ad router
- Support for a wide range of devices
- Real-time analytics & reporting

## Benefits

- Access 25+ billion ad opportunities and monetize at scale
- Provide broadcast-grade quality viewer experience
- Handle multi-million concurrency
- Leverage in-depth data & insights

# Support for new ad formats

Deliver unintrusive, meaningful viewing experiences

**Dynamic brand insertion (DBI)**

Brand insertion

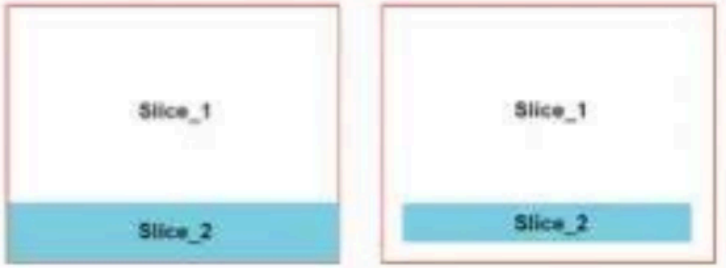

2D ads composited into the scene for natural look & feel

Product insertion

3D products composited into the scene for natural look & feel

**Graphic overlay ads**

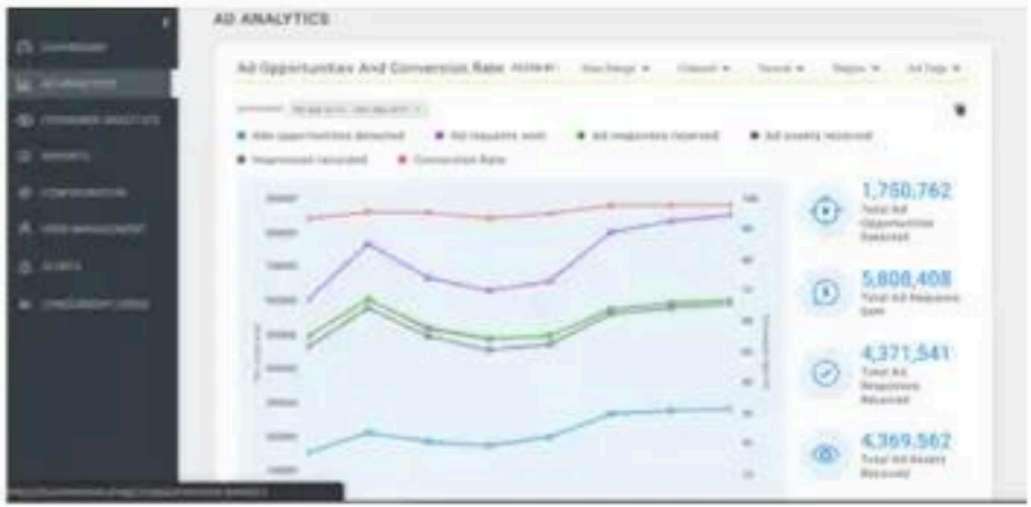

Static or graphic ads in the lower third delivered intuitively based on the video content

**Contextual targeting**

- Seamless onboarding of video data for contextual targeting across CTV
- Content providers can realize the full value of their assets

## Amagi ANALYTICS

Comprehensive viewership and ad analytics to bolster your content & ad strategy

### Features

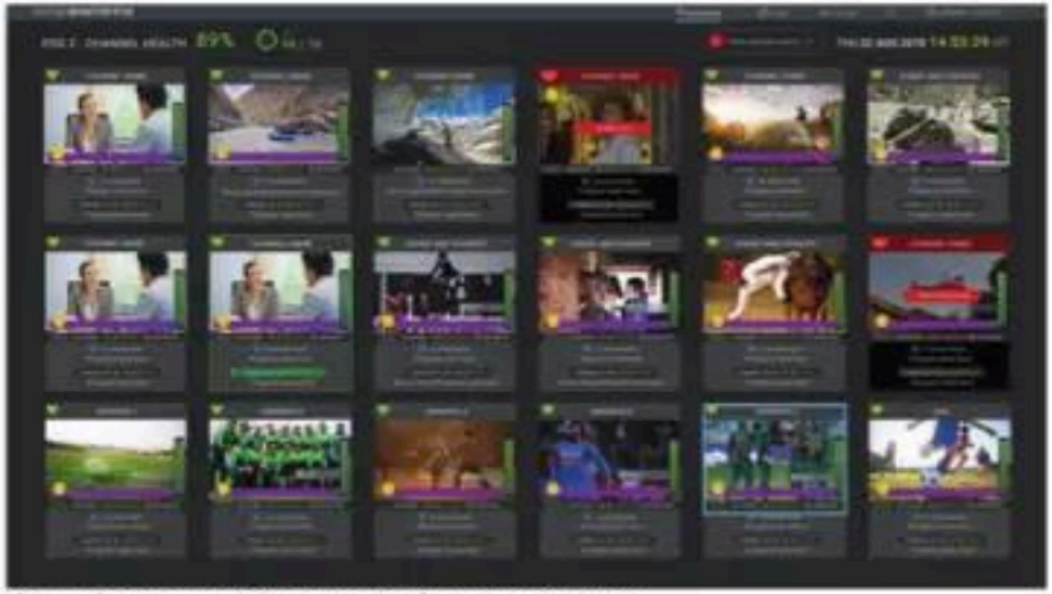

- Access metrics for any region, device, channel, content asset, and time zone
- Get live data on concurrent users on a CCU graph
- Generate key reports for viewership and advertisement operations

### Benefits

- Gain foresight into monetization strategies, revenue planning, viewership patterns & channel programming

# Amagi managed services platform

Fully managed services with 24x7 tech support

Cloud smart video pods for monitoring

## Features

- 24x7 on-call support & monitoring
- Ingest/delivery to & from Amagi's cloud availability zones
- Secure PCR controls for triggering breaking news by local station operator
- MCR controls by Amagi operator
- Periodic TX-readiness reporting

## Benefits

- Effective, error-free monitoring with the highest SLA
- Enjoy advanced automation and fully transparent operations with web UI access
